

Field Trip Report

Venue for the Activity:- Nari pharmaceuticals

Class:- IXth

Date:- October 6th, 2018

In charge:- Ms. Kanika Singh

Summarized Content:-

Extra curricular activities, field trips and soft skills are as important for a student as his excellence in Academics because these are the things which would help them in a longer time and increase their knowledge and would help them grow their personality. Bhartiyam International School never leaves any stone unturned to give its students enough opportunities to grow their personalities and let them learn something new. In addition to the efforts put by the school towards the growth of the child, a field trip to Nari pharmaceuticals, sidcul, Rudrapur was organized on Saturday i. e. 6th of October 2018 for classes IX

Nari pharmaceuticals are a renowned company which produces different kinds of medicines for women only. It was a great opportunity for the students to unveil the process through which medicines are made and tested and finally packed. They came to know about different processes, machines, criteria and rules and regulations to make medicines and to run a pharmaceutical company.

This educational trip, like any other educational trip, was really beneficial for the children.
