

TRIP TO MEENAKSHI PACKAGING FACTORY

Classes:- III and IV

Date:- 11-10-2018

In charge:- Srishti Srivastava

Summarized Content:-

Field trips are a very important part of student's educational life. They are meant to add up some extra knowledge apart from everyday bookish content. It is a practical way to learn something that has an effective outcome for students. Our school therefore believes in such trips on a regular basis, in account to which, a trip to 'Meenakshi Packaging Factory' was arranged for students.

This visit was a marvelous experience for both the students as well as the teachers. The students were super excited to know the complete process of packaging various items with the help of cardboard sheets.

Students got to know each and every step of the whole process by viewing the working machineries, touching the output after every stage and also by verbal explanation by the honorable owners and the workers.

Students came across the facts that have to be taken care while producing the packaging sheets which helped them to understand the importance of clean and healthy packaging behind every stuff they face in their daily life. They were also surprised to see the whole procedure in just a couple of minutes as it was done by automatic machines.

Such experiences results in building up great interest for co-curricular activities amongst the students. It is also a proud moment for our institute that we could provide such facilities for our students added up their knowledge practically and also brought a sparkling smile on their faces.
